Dear Stuart

RE: Sydney Metro City & Southwest - Sydenham Station and Junction Project Low Impact Works within the Heritage Areas

Thank you for providing the following documents for Environmental Representative (ER) review and endorsement as required by the Condition of Approval A24 (d) of the Sydney Metro City & Southwest project (SSI – 15_7400 January 9 2017).

- Proposed Pre-construction Activities, including the associated risk assessment;
- Sydenham Station and Junction Heritage Impact Assessment (4 May 2018);
- Addendum to the Sydney Metro City & Southwest – Chatswood to Sydenham Historical Archaeological Assessment and Research Design Report to Jacobs/Arcadis/RPS (January 2018); and
- Sydney Metro Unexpected Finds Procedure.

As an approved ER for the Sydney Metro City & Southwest project, I have reviewed the proposed work and supporting documents provided by John Holland & Laing O'Rourke joint venture (JHLOR). Although endorsed as low impact, the works may potentially affect heritage items within the Central Station precinct and are thus defined as construction unless otherwise determined by the Secretary in consultation with OEH.

We consider the documents are now appropriate for submission to the Secretary for consideration.

Yours sincerely,

Annabelle Tungol Reyes
Environmental Representative – Sydney Metro – City and South West
