Dear Carolyn

RE: Endorsement of Visual Amenity Management Plan, Sydney Metro Southwest – Corridor Works

Thank you for providing the following documents for Environmental Representative (ER) review and endorsement:

- Visual Amenity Management Plan – Southwest Metro Corridor Works, Rev 04 dated 6 September 2021 (Ref: SMCSWSSJ-JHL-WEC-EM-PLN-000014) (the VAMP).

The VAMP forms part of the Construction Environmental Management Framework (CEMF) and it is a requirement of the Sydney Metro Sydenham to Bankstown – Staging Report Rev 5.0, 5 August 2021 for the ER to review and endorse the VAMP prior to implementation.

Rev04 updates the VAMP to include the Bankstown Early Works scope, which includes the construction of the Bankstown Station Metro Services Building (MSB) and addresses additional conditions associated with the Station Design Precinct Plan (SDPP). As an approved ER for the project, I have reviewed and provided comment on the VAMP for consistency with the requirements in or under the Infrastructure Approval and now consider it appropriate for implementation.

Yours sincerely

Jo Heltborg
Environmental Representative – Sydney Metro – City and South West
