Dear Carolyn

**RE: Approval of Minor Amendments to the Visual Amenity Management Plan,  
Sydney Metro South West Enabling Works (SMEW)**

Thank you for providing the following document for Environmental Representative (ER) review and endorsement:

- Visual Amenity Management Plan – Early Works, Rev 5.0 dated 7 October 2021 (Ref: SMCSWSSJ-JHL-WEC-EM-PLN-000006) (the VAMP).

The VAMP forms part of the Construction Environmental Management Framework (CEMF) and it is a requirement of the Sydney Metro Sydenham to Bankstown – Staging Report Rev 5.0, 5 August 2021 for the ER to review and approve minor amendments in the VAMP.

The VAMP was updated to satisfy the periodic review, and to include the setup of the Canterbury Compound.

As an approved ER for the project, I have reviewed and provided comment on the updated VAMP for consistency with the requirements in or under the Infrastructure Approval and now consider it appropriate for implementation.

Yours sincerely

Jo Heltborg  
Environmental Representative – Sydney Metro – City and South West
